

Construction Waste Management Plan Application

Building permit applicants with projects of 1,000 square feet or more must prepare a Construction Waste Management Plan documenting project compliance with the Green Building Code adopted by the City. **Applicants** must complete this form and submit it with each building permit application to the City of Barstow Building & Safety Department.

No permit will be issued without completion of a Construction Waste Management Plan.

Date: _____ Permit #: _____

Address: _____

Contractor: _____ Phone: _____

Owner: _____ Phone: _____

Payor: _____ Phone: _____

Permit Use: _____

Project Name: _____

Under the terms of the Green Building Code, builders **must choose** one of the following means to recycle a minimum of 50% of the construction debris from the project. Please **check the appropriate box** indicating the recycling method of your choice:

- Contract for hauling services with the City's franchise hauler, assuring that all Project debris will be taken to the Barstow Landfill Diversion Program.
- Self haul all Project debris to the Barstow Landfill Diversion Program.
- Self haul all Project debris to an appropriate Construction Materials Recycling Facility.

Applicant must provide acceptable proof of recycling and/or disposal of Project debris to the City in the form of invoices, receipts and/or weight tickets.

Disposal Tonnage

Estimated tonnage of waste to be generated by Project _____

Estimated tonnage of waste to be recycled by Project _____

I am aware that all receipts, weight tickets, invoices or other acceptable evidence of recycling of construction debris must be provided to the City within 30 days of final inspection as proof that at least 50% of the amount of debris generated by this Project was recycled, that non-compliance results in Permit Applicant subject to citation and/or fine.
