

The City of Barstow's Waste Water Treatment Plant has purchased a new wheel loader, which will provide the department with the ability to handle solids without negatively affecting other citywide resources and departments.

The wheel loader has been purchased through the Wastewater Enterprise Fund, with the total cost of \$236k. The average lifespan for equipment of this caliber is approximately 30 years; which will be used on a daily basis, enhancing the department response during storms, and emergency situations!

Maximizing our resources will continue to bring the quality of service our residents deserve.

For more information, contact the City's Waste Water Treatment Plant 760-252-2538.
